

Please don't allow cellphone use on planes. I will use myself as an example why. For whatever reason, whenever on a cellphone, my voice ratchets up in volume. I am annoying to all around me including my wife, who happens to otherwise love me.

Imagine me on a plane surrounded by those that do not love me. I am convinced that I will become a hate crime victim.

Most of the people I know have the same cell phone habits. I can't imagine sitting next to me on a flight of any duration.

Please help keep our skies safe. Remember, cell phones don't kill people. People sitting next to people using cell phones kill people.
